Re: Former Plainwell Impoundment
Project #: 64530.640

Dear Shari:

On behalf of the Kalamazoo River Study Group, we are submitting a description of a potential remedial alternative for the former Plainwell Impoundment. KRSG recommends USEPA consider including this alternative for analysis in the Feasibility Study being conducted for this area. The alternative is described in the document titled "Potential Remedial Alternative for the Former Plainwell Impoundment".

A separate report (Attachment A) described the most recent results of erosion pin monitoring in the Plainwell Impoundment. KRSG requests that both documents be placed in the administrative record for the Site.

We would be happy to answer any questions you might have about these documents. Thank you for considering this submission.

Sincerely,

BLASLAND, BOUCK & LEE, INC.
